The engine is placed in competition with any other made, and has not been found wanting in a single particular, but found in many respects better in construction and much more economical to operate than many others.

"The Barrington" requires no experienced operator and is just what the farmer needs. Many of these engines are now in use in this vicinity. Of late the following orders have been filled, in size from 2 to 14 horse power: Prof. Jordan, Kimberly homestead; H. Brinker, August Walbaum, farm use; A. Greve, Schaumburg, S. L. Day, Chicago; L. **Conducted a Village Meat Market.**  
He was a man of push. He played marbles for keeps when a boy and cheated all his playmates out of their eyes. He swapped a bladeless knife, eight inches long, for a four blades, knife that for fifty cents, brought a pound of sugar and made a barrel of homonade, which he sold for \$5 one circus day. He started in business and sold bad meat for choice cuts and made a fortune. When he got \$1000 he organized with \$5000 capital and sold the stock at par. When the company busted it was found that he had sold some time before. When he died he was a millionaire and left it all here. It is warm where he is now.

The farmer or business man located in some remote district is listed with the Chicago post-office. Business houses in Chicago and elsewhere are using the telephone list to send out samples of their goods with advertising matter.

We are informed that the demand for graduates of the Metropolitan business college to fill business positions far exceeds the number which the college can turn out. Quite a number of young people who want to get well started in business would do well to attend the college and learn stenography, typewriting and bookkeeping. We know of no better way to get a good position. Write to the principal of the college, Mr. O. M. Powers, corner Monroe street and Wabash avenue for circulars.

### BUMPER CROPS

Wonderful Yield of Small Grains is Reported from All Districts.

The calamity bowler is not in evidence this year and pessimists have no place in the population of this section of earth, according to reports as to the yield of farm products. Stories told by individuals and newspapers are surprising and sound like tales from a fisherman's notebook.

In a review of the crop situation published by the metropolitan press, we find Lake county near the top of the column in the list of counties in the northern tier showing a greatly increased product over 1904.

The Lake County Independent tells of oats on the Carroll farm near Bondout which measured 5 feet 8 inches, and rye on the Campbell farm in Garneau which stood 6 feet 9 inches in its stocking feet. In Warren township corn is very far advanced and hardening well. Right down here in little Cuba there is corn that is 10 to 12 feet in height and step ladders are necessary to use in getting up to the ears which are bending low and of great size. You don't have to go to Dakota to see farming land. All a man has to do is to take a good look about him as he travels about this region. But if he goes wandering in his neighbor's cornfield he'd better tie a string to the fence and hang on the other end of the string. If he don't know enough to follow a row he will get lost.

The only complaint heard from the farmers was that the heavy rains of last week interfered with threshing and help is scarce.

**Death of Alonzo D. Hutchinson.**  
Alonzo D. Hutchinson, well known to many of our people, one who spent his childhood days here, passed away at his home in Chicago, Monday, Aug. 21.

Mr. Hutchinson was the eldest son of Mr. and Mrs. Chester Hutchinson, and was born in Barrington, March 30, 1869. When 16 years of age he secured employment in Chicago and has since that time made his home there. He married Miss Lizzie Way, of Chicago, December 21, 1892, who survives him. Besides the widow his mother, three brothers and five sisters are left to mourn his departure.

The deceased was a member of a Chicago Tent Knights of the Maccabees of the World.

The remains were brought here for burial Wednesday afternoon, services being held at the home of his mother, Rev. Lapham of the M. E. church officiating.

Interment in Evergreen cemetery.

**Just What's the Matter.**  
An attempt was made to get up a union picnic of several societies here not long ago, and the plan failed. It is asked, "What's the matter?" To be candid in replying we will say that there is too much jealousy and too much gossip among factions in this village. Yes, it is so in all small villages, but not so prevalent. When will people cease to delight in gossip? It retards the prosperity of the village; it is a humming bird with eagle wings and a voice like a fog horn. It can be heard from Dan to Heabscha, and has caused more trouble than all the bedbugs, fleas, mosquitoes, chinch bugs, yellow fever, smallpox, goat and indigestion, beer and milk mallow that this great land of the free, but owned by the beef trust, has known or will know when Gabriel and Dowie give orders to close business and stand up to be counted. In other words, as a western editor says, "it has got war and hell backed up in the corner howling for ice water."

If you can't say anything good of your neighbor don't say anything.

Some amusing stories are told of the new use for the telephone. An operator in one of the towns near Chicago was addressed by a young lady who had apparently struck upon a happy thought. "Oh, central," she said, "Call me tomorrow morning about twenty minutes before that 6:40 train goes to Chicago. I have just got to catch that train. And say, I wish you would telephone down to the depot before calling me and ask if the train is late. If it is behind time call me accordingly." This was a seven-eleven. Thank you. Good-bye.

**Ask an Advance.**  
Telegraph operators on the Chicago & North-Western system have presented a new wage scale to the company. It is said that the demand is for an increase of about ten per cent. Chairmen of the several committees having in charge the work of the O. R. T., organized and in charge of the telegraph work on the system, have held several conferences with officials in Chicago lately, the result of which has not as yet been given to the public.

**George Otis' Launch.**  
Geo. Otis of Barrington has one of the finest and swiftest gasoline launches which ply on Fox river. This boat, which will easily carry 18 or 20 people, was designed and constructed by Mr. Otis, the interior being finished in hardwood and finely polished. It is equipped with an 8-horse power gasoline engine, which gives it motive power to spin along the surface of the river at a rate yet to be equalled by anything he has seen along the noble Fox.—Nunda Herald.

Miss Esther A. Lageschulte, daughter of Mr. and Mrs. Fred Lageschulte of Barrington township, and Rev. Theo. Suhr, of Fullerton, Neb., were united in the bonds of matrimony at the home of the bride's parents, Wednesday afternoon, Rev. Suhr of Cleveland, Ohio, father of the groom, performing the ceremony in the presence of a large circle of relatives.

The bride is a lady known to the majority of residents in this section, having been prominent in church and Sunday school work, and as an educationist who has assisted in many local entertainments.

The groom is the son of Rev. Theo. Suhr, Sr., a former pastor of the Salem church of this village. The groom is known to many of our people, having resided here and has also preached in Salem church since entering the ministry. He is now pastor of a church at Fullerton, Mo.
