**OUR FREIGHT RATES LOWEST.**

Average Little More than One fourth Those of English Railroads.

A recent special to the New York Times from Washington state that reports recently received from the Bureau of Manufactures show some interesting comparisons of the freight rates in Europe and this country. The average freight rate on English roads is nearly 2 cents per ton mile. The actual figures are 1.93 cents. A ton mile of merchandise or live stock costs 2.94. Against these the figures for the United States are surprisingly small, being 0.58 cent. On German roads it is 1.43 cents; on French \$1.55; Austria 1.18, and Hungarian 1.30.

England's passenger rates per mile on the same classes as cited for the

United States were 4 cents, Germany's 3 1/2 cents. For their average day's wages workmen can travel as follows: America, 65 miles; British 35, Germany 55, French 40, Belgian 35, Italian 38, and East India 30 miles.

On American roads locomotive engineers average \$4 a day, English \$1.62, Belgian \$1.01. American firemen get \$2.25, British 91 cents, Belgian 72 cts.

Railroad laborers in the United States get from two to four times as much as laborers on foreign roads. Forty per cent of the gross earnings of American railroads goes to labor, while only 25 per cent goes to capital. In England labor gets 27 per cent, capital 38 per cent; in Germany the division is equal.

In the last four years American roads paid \$74,000,000 for cars engines etc. The roads were capitalized at \$12,792,806,024 (new \$10,000,000) on the basis, in 1903, or \$61,300 per mile. English roads that year stood for \$27,474 per mile, German roads for \$104,725, French for \$123,022, Russian for \$76,000, Austrian \$110,475.

**PROGRESSING NICELY.**

Work Going Forward at Flagler Iron and Steel Company plant.

The question is often asked by people about this vicinity, "What is going on down at the Highlands? Is that new company going to operate the big plant there?"

In answer we will say that the work of remodeling the plant is going forward as rapidly as plans will permit, and that the company will operate the plant as soon as machinery, now being manufactured, can be installed.

The Flagler Iron and Steel company is not a mushroom corporation. It has ample capital, has general offices in the First National Bank building, Chicago, and is officiated as follows: J. K. Flagler, president; W. P. Dickerson, John Clancy, R. Dorothy, vice presidents; W. R. Dickinson, secretary. It owns the Klamon Iron mines (500 acres proved ore lands) at Republic, Mich., and the big tube and pipe mill at Chicago Highlands, from which will be turned out steel and steel tubular goods, such as tubes for locomotives, marine and stationary boilers; lap and welded pipe for steam, water, gas, oil wells, condutt pipe for all purposes where pipe is used.

The Chicago Highlands mill and lands occupy 50 acres, and are directly connected with the Michigan mine by C. & N.-W. and C. M. & St. P. railroads, the latter operating over the E. J. & E.

The gas furnaces, gas producers and huge traveling cranes are now in course of construction, near completion, and will be placed in position before the end of the year.

Much has been done to the big buildings at the Highlands in the way of remodeling, painting, etc.

When the mill starts it will begin on contracts for all tubes and pipe it can produce in ten months, and will be the only tube mill in the middle west. There is not a tube or pipe mill on the Pacific coast.

The outlook is exceedingly bright for the Flagler company, and its prosperity will give a substantial impetus to property interests at the Highlands and in this village.

**Yates Weak in Cook County.**

It is now stated that former Governor Yates intends to invade Cook county on a speech making campaign in his desire to obtain the seat in the United States Senate held by Shelby M. Cullom. It has been current report that the former governor had little strength in Cook, and that it was likely the state administration would select some other candidate, like General Hamlin, to oppose Cullom in Cook county and let Yates and Cullom fight it out in the country.

For ourselves we are inclined to the idea that Governor Deneen is strong enough in Cook county to land with most any good man he decides to help in the senatorial race, whether that man be Shelby M. Cullom, Richard Yates, H. J. Hamlin, or L. Y. Sherman, and that the Governor will come pretty near naming the next United States Senator.—Harvard Herald.

**A Girl's Opinion.**

A little school girl is said to have recently made the following rash statement concerning the sterner sex. Her composition was on men, and this is what she says: "Men are what women marry. They drink and smoke and chew and swear, have ever so many pockets, but they never go to church. Perhaps if they wore bonnets they would. They are more logical than women and also more zoological. Both men and women have sprung from monkeys, but the women certainly sprang further than the men."
