CHAPTER XIII.

Lang gets a few pointers concerning the City.

The emigrant train crossed the ford at early sunrise. Bowie Bill, risen now to the dignity of leader of the train, though seemingly reckless as to the danger, that had surrounded him in the past, dispatched a messenger in advance of the party, who notified the sub-posts of the city of the near approach of the emigrant train, so that in case of a second attack assistance might be rendered if needed.

Lang was riding alongside one of the schooners, thinking of his last night's adventure, when he was accosted by Golden.

"Have I ever met you before this trip?" Golden asked.

"Has Regan not told you who and what I am?"

"Sure. But how did you know of me and my mission?"

"Don't you remember the German kid who was confined in 'the Tombs' for the killing of Simeon Monroe?"

"Warwick Street vag?" asked Louis in surprise.

"Not the kid I made a few passes at and told him I could get him out if he wanted to escape?"

"The same!"

"Yes, I remember you now," said Golden, as if relieved of some heavy burden, "but what bothers me is how you knew me."

Lang saw that he was in for an explanation, whatever Golden's reason for desiring it, and was guarded in his replies. "Since I became a man, and have had a little experience in several secret societies, I came to the conclusion that the signs that you made to me had some deep meaning. Your power and influence which I knew you would have—powers to free me from the 'Tombs,' made me often desire to meet you."

"You did not seem very enthusiastic

to talk of yourself. I don't think that you are criminal enough to become happy in the Convict City. I rather like you, Lang, and I agree now for your own good. You have in your pocket ten thousand dollars, the price of your admission; hesitate, express a desire, and I will put you on the back of a swift horse under you! Your decision!"

"This was no time for Louis to hesitate. He felt it.

"I am resolved to proceed," he replied firmly.

"Once more I say," and Golden's voice was husky with excitement. "Pause before it is too late. This is your last chance to escape from the power of the octopus! Some large city is the place for you—you will live and die within the city's walls. You do not know what thankless man you are trying yourself to. They know your utter helplessness, will use you to their own ends. You do not deserve so vile a fate! Turn back!"

Lang put his hands upon Golden's shoulder. The old man's evident desire to do the favor, for a brief moment unnerved the youth. "Golden, I thank you for your words—it shows me that like myself, you are not wholly bad. You are true to your friends! But I am resolved to go on. My condition can be no worse than it has been—thus it is now. It has been the dream of my life to see the inside of the convict city. What I have done to gain my revenge I feel will place me in the power of a most desperate man. Nowhere but with you will I be safe from Denver. I am avenged—let the penalty be what it may, I must go on!"

"Do he it," said Golden. "I have done my duty as a man. Your fate is upon your own head!"

"I will remember your expression of friendship," said Louis.

Golden resumed to debating with

12 years of age my mother died; it is well she did! I was left quite alone, as I never had the care of a father. I turned newsboy, bootblack and general street game. Poverty drove me to crime. For food I broke into a bakery shop and was caught in the act of a revengeful nature. I rejected a reward, and was sentenced to a man who had me punished, and was as bitter against the unthinking judge, whom I blame for not acquitting me. The judge was hurried out, and I was sent up some years for incarceration. The judge's residence was robbed, I made him a poor man. I was jailed for some time, but I knew of no safe place for me. It was then I thought of founding a refuge for just such people as myself. It was a child of my brain, but the real founder of the city as it now stands, was an outlaw by the name of Mitchell, 'the teacher,' who was called, because he was a learned man and had at one time piloted this rookery.

"The town is naturally protected and lies at the foot of three mountains, hard of entrance. Mitchell was perfectly at home in this district and it was an easy matter for him to surround himself with a band of desperate fellows. It took three years to start, and fully ten years to set the village on a running order, and this only by the aid of a number of prominent persons. In 1880 it had a population of seven hundred, of which number only fifty were women. Under the leadership of a doctor by the name of Schiller the town has reached a population of fully nineteen hundred, with fully four hundred women, and they are on the increase.

"The government of the city is not what may be termed an absolute monarchy. We have a king, but his will is not absolute. He rules according to law, and is amenable to the law. Marriage is an honorable state. Here a man's honor is everything, strange as it may seem. In the matter of punishment, the death penalty predominates, and is a queer thing. Two persons who have forfeited their right to life and liberty fight to the death, and the survivor becomes free again. This works well. We have more law adding citizens in the city to the square inch than any one place in the 'states.' When once you enter the city you will be expected to work. There are many occupations, mostly labor and guard duty goes round in trades that have been learned in jail; other positions trading takes place. If you are assigned to a certain duty that it displeases you, you can trade or buy a substitute.

"I am afraid I tire you, Lang, so will end my explanation by saying to you traitors and spies are given no chance for life!"

"What do you mean?" demanded Lang, who was a little taken off his guard at the abrupt ending of Golden's conversation.

"I mean nothing," very calmly replied Golden. "I only wish to warn you against taking a false step. Don't let your better nature get the best of you here—suspicion is sometimes as much to be dreaded as actual facts."

"I am at a loss to understand you, Golden. I am no hypocrite; I don't want to appear anything else than I am. Of course you know I am hardened in crime—but, pardon me, I am not a traitor!"

"I believe you," said Golden, soberly. "But I cannot help feeling a certain fear that I am returning here to die, and I must make a confidant of somebody. Thus far I have been testing you; you have stood the test well; there now remains nothing for me to do but bring you into the city."

"Have no fear, Golden, that I shall bring discredit upon you! Remember this: I am not a traitor; I am an honest man or not—as you choose to call me—I will never go back upon a friend!"

"To-morrow," said Golden, as if deeply thinking, "to show you that I trust you, I will give you a secret."

To-morrow brings many changes. (To be continued.)

CURIOUS DEEP SEA VISION.

Cephalopods Photographed by Their Own Light in Some Cases.

A French writer in a scientific magazine has given an account of the deep-sea depths of 28,000 feet, the temperature tending toward zero, the perpetual darkness reigning below depths of about 1280 feet. At that level plants, dependent of light, can not exist. The animal life must be carnivorous. The organs of sight not being used, have become atrophied and disappeared.

Yet there is light even in that lightless world. A German exploring ship found a fish with enormous eyes at a depth of 4,600 feet. Phosphorescence is common in these horrors of the sea. Sometimes special organs flash light. Sometimes the phosphorescence is caused by a mucous secretion on the surface of the animal. The crustacean chrysochorus has not only phosphorescent organs, but including what are, in effect, a reflector and a lens.

Certain cephalopods have actually been photographed by their own light. The luminous organs attached to the eyes allow the animal to see its prey. The other luminous organs may perhaps be a lure to the prey. The deep-sea life is a most curious and lifeless creatures are predatory and do not need to see. Thus even in that vast darkness there is sufficient light—Everybody's Magazine.

Leipzig Book Trade.

In the city of Leipzig, the headquarters of the German book publishing trade, there are 2,816 firms selling books, and its Book Publishers' Exchange has 3,240 members. Leipzig has not only one of the most celebrated universities in Germany, but as a city is renowned for its music schools and concert.

DEATH HAS SHOCKED BOSTON.

Patrick A. Collins Called Suddenly—Prominent in State Politics.

Mayor Patrick A. Collins of Boston dropped dead at Hot Springs, Va., Sept. 14. Mayor Collins went to Hot Springs for his health about Sept. 5 with his family.

Twice Mayor of Boston. Patrick A. Collins was twice elected Mayor of Boston.

He was a lawyer by profession and was famous as an orator.

He had been in both branches of the state legislature, served in Congress three terms and was Consul General at London, 1895-97.

Mr. Collins was born at Fermoy, Ireland, March 11, 1844, and four years later was brought to this country by his parents.

His early education was secured in the public schools of Chelsea, Mass.

After leaving school he secured a position as office boy and later became a journeyman upholsterer. As soon as he accumulated sufficient money he went to college and graduated from the Harvard Law School in 1871.

Before his graduation he served a term in the Massachusetts House of Representatives and was a member of the State Senate, when admitted to the bar.

He was elected to the United States Congress and served three terms.

In 1892 he was appointed United States Consul General, in London. President Cleveland and served a full term of four years.

On his return he took an active interest in Massachusetts politics and in 1899 was nominated by Democrats for Mayor of Boston. He was defeated by a narrow margin and two years later was elected Mayor of the city.

General Collins was one of America's great orators.

Royalty Fond of Motoring.

A distinctive feature of the motor industry has been the generous support accorded to it by the sovereigns of the world. Apart from King Edward, the king of Italy and the king of Spain, who are well-known enthusiasts, there are the German emperor, who has four or five cars; the king of the Belgians, who has three cars, and who at present has only one, but contemplates adding to his "stud."

The king of Portugal and the queen of the Netherlands are also of the company. President Loubet has a car which he occasionally drives himself, and the prince of Monaco, in addition to a very powerful car, has a motorcycle base coating. Anyone can apply it. Mix with cold water. Alabastine does not rub or scale. No drying disease germs and vermin. No washing of walls after use applied. Buy only in package properly labeled. Alabastine is not a disease breeding but of cold water glue kalamine, not a covering stock on with paste like wall paper, but a natural cement rock base coating. Anyone can apply it. Mix with cold water. Alabastine does not rub or scale. No drying disease germs and vermin. No washing of walls after use applied. Buy only in package properly labeled. Alabastine is not a disease breeding but of cold water glue kalamine, not a covering stock on with paste like wall paper, but a natural cement rock base coating. Anyone can apply it. Mix with cold water. Alabastine does not rub or scale. No drying disease germs and vermin. No washing of walls after use applied. Buy only in package properly labeled. Alabastine is not a disease breeding but of cold water glue kalamine, not a covering stock on with paste like wall paper, but a natural cement rock base coating. Anyone can apply it. Mix with cold water. Alabastine does not rub or scale. No drying disease germs and vermin. No washing of walls after use applied. Buy only in package properly labeled. Alabastine is not a disease breeding but of cold water glue kalamine, not a covering stock on with paste like wall paper, but a natural cement rock base coating. Anyone can apply it.
