strong and the street and the street and lacerations.

On the East Side streets conditions are almost unbearable. The return of hot weather has added to the seriousness of the situation.

In places the heaps of garbage practically fill the streets and traffic is interfered with. Attempts to dispose of the accumulations by burning have been largely unsuccessful.

But it is not almose the East Side that suffers. The entire city is affected by odors. The health department is still struggling to make some impression on the mountainous heaps of recises, but even if the full force returns to work Tuesday it will require several days of hard labor before nor mai conditions are restored.

Operators' Strike-May Spread.

Chicago.—Secretary Wesley Ressell, of the Commercial Telegraphers'
union, Monday admitted for the first
time that active preparations were under way for the extension of the strike
against the Western Union and Postal
comfinites. This is taken to mean
that the union leaders have despaired
of winning their contention with the
big tolegraph companies by a single
strike demonstration at San Francisco,
and are now ready to enlarge their strike demonstration at San Francisco, and are now ready to enlarge their operations. Kansas City and St. Louis are two western cities that are mectioned in connection with the proposed new strike field. It is believed that the operators will be called from the offices in those cities within a week.

Save the Bables.

INFANT MORTALITY is something frightful. We can hardly realise that of all the children born in civilized countries, twentytwo per cent, or nearly one-quarter, die before they reach one year; thirtyseven per cent, or more than one-third, before they are fire, and one-half before they are fifteen!

We do not hesitate to say that a timely use of Castoria would save a majority of these precious lives. Neither do we hesitate to say that many of these infantile deaths are occasioned by the use of narrotto preparations. Drops, tinctures and soothing syrups sold for children's complaints contain more or less opium, or morphine. They are, in considerable quantities, deadly poisons. In any quantity they stupely, retard circulation and lead to congestions, sickness, death. Oastoria they stupely, retard circulation and lead to congestions, sickness, death.
