SALINA SORE AT FISH, JR.

"Young Set" Was Prepared to Welcome Multi-Millionaire's Son. ONE POINT OF VIEW

It was the kind of a teacher in a negro school to impress upon the minds of the youths the benefits derived at Tuskegee and other seats of learning for the ambitious negro. New York.—The telegraphophone, the newest device for reducing wear and tear on human throats, is being tried for the first time at the Grand Central station by the New York Central road. If after a fair trial, the invention proves a certain success, it is departing trains by station attendants will be dispensed with. The telegraphophone consists mainly of seven large brass horns distributed over the station. These horns are connected by wires with a centrally situated booth.
