Just What You Can Do

WITH

LIQUID VENEER

Remember, Liquid Veneer is not a furniture polish; neither is it a varnish, but a carefully and scientifically prepared article that acts as a food for the varnish or gloss.

It is the only preparation on earth that will remove tarnish and that very undesirable bluish discoloration which often appears on PIANOS and other highly polished furniture. It may be used to excellent advantage on picture frames and moldings, for it will remove every particle of dust and smoke, take off every particle of dirt and grease, take off every fly speck, and bring back all the original luster.

It may be used on WHITE FURNITURE without the least danger of discoloring it; on the contrary it will clean and restore it to its former spotless appearance.

INK STAINS VANISH. COFFEE DESKS, INK REPOINERS and BOOK-CASES may be freed from ink stains and made to shine, if the stains have not become too deeply imbedded in the grain of the wood. HARDWOOD FLOORS, MARBLE, STAIR BALUSTRADES and all INTERIOR WOODWORK may be easily and quickly cleaned. It removes grease instantly. Gas fixtures and chandeliers may be made bright and clean. It is positively the finest thing in the world for cleaning and polishing AUTOMOBILES and AIRCRAFTS. It will make the enameled parts of a BICYCLE look like new. We now come to another use of this great discovery for which it is simply invaluable and which alone should commend it to every cleaner and intelligent housekeeper. We refer to the work of dusting. Everyone knows that a feather duster or a dry cloth not only scratches furniture but merely removes dust from one article to scatter it through the atmosphere of a room until it is finally deposited on another. Avoid all this trouble by getting into the habit of using your dusting with a cloth slightly moistened with LIQUID VENEER.
