Some of the great Atlantic liners employ 150 firemen.

Japan is steadily increasing her exports of Jintichias.

Everybody will rejoice to hear that the hens are laying only strictly fresh eggs this year.

Bulls created a scare lately in a street in Mexico. They do that regularly in a street in New York.

The anarchists' favorite way of defying society is to persist in going and staying where they are not wanted.

Lard is one of the chief Mexican imports from the United States. The figure for 1907 was nearly 7,000,000 pounds.

When a man says that he never objects to fair criticism he means usually that he doesn't protest against compliments.

We are glad to announce that in spite of the recent stringency the regular spring demand for fishhooks is as brisk as ever.

The famous automobile racers around the world are so early in the fall when they are loaded into a rail-road car or a steamship.

German leads the world in the production of beet sugar, British India in cane sugar and the United States in millionaire sugar growers.

Judging by the thickness of the dust on the farmhouses so early in the season there appears to be no diminution this year in the popularity of the automobile.

At Mayville, Ky., high school students are striking because they do not like the new teacher. That unfortunate instructor should beware of juvenile night riders.

A large and very fine wildcat has been captured alive in eastern Ontario. The theory is that all these animals are located around Cobalt.

Manchuria doubtless cherishes hopes of ceasing to be a bone of contention soon. There is no restriction placed on anyone's dreaming, but it is often dangerous to try to make dreams a reality.

Why not put the anarchists in a nice large field and let them play with bombs to play with? The field would be well plowed when they were through, not to mention such a thing as fertilized.

How is this for a verbatim copy of a personal in the Boston Transcript: "Italian duke, aggressive, desires continuous wireless correspondence with American lady of means. Object Macaroni."

Announcement is made that the drought has so affected the Cuban sugar crop that the price will show a marked falling off. As a result American refiners will be compelled to import large quantities of supplies from Europe, where the beet sugar industry flourishes. Is this not a hint to Americans? asks the Troy (N. Y.) Times. If the old world makes a conspicuous success of beet sugar production, why cannot our people do the same thing?

Plans are maturing for the erection of a statue of Alexander Hamilton in Washington. It is rather curious that the intellectual prodigy whom Mr. Bryce characterized as "the greatest constructive statesman of the nation" should be represented at the capital by no monument, when so many lesser men appear in marble or enduring bronze. Perhaps, however, it will be hard to make a monument which would overpower his own great work, the "Federalist."

Are slovenliness and general lack of neatness in one's dress and person signs of irritation of the nervous system? If so, it behooves all testators to beware of their retinas and of their personal cleanliness. Future contestants of their last will and testament may be watching them and taking notes of their appearance and manner of comporting themselves. Besides, personal neatness in man or woman is an attraction, and it costs nothing but a little care.

Again in proof furnished that weather-vagaries are not confined to the United States. Germany is having an extraordinary instance of winter lingering well into spring. The latest reports are reported in many parts of the empire, with cold more suggestive of January than April. Italy also is a sufferer in the same way. A Rome dispatch announcing that intense cold prevails throughout the country, snow having fallen in towns where ordinarily the climate is very mild, includes Milan and Perugia. Sunny Italy appears to have lost its balance for the time being.

J. M. Barrie recently headed a deputation representing a large majority of the dramatic authors of England who petitioned the British secretary for the abolition of the dramatic censor. In introducing the deputation Mr. Barrie said it represented every movement for the better that had been in the English drama for the last 50 years. Whether dead or alive, great or humble, English men of letters had been a constant and almost solid body in passionate protest for nearly 200 years against the humiliation of the censorship.

REAPPEARANCE OF PROSPERITY.

BOLD BANDITS ARE FOILED

TRY TO ROB BANK MESSAGERS IN BROAD DAYLIGHT.

Bravery of Men Attacked and of Woman Frustrates Crime on New York Streets.

New York.—In broad daylight and in one of the densely populated portions of the city three thugs late Monday afternoon made a daring attempt to hold up and rob a trio of bank messengers as they were carrying \$43,000 in cash from one of the bank's branches to its main building. Black pepper was showered upon the messengers and another slashed with a knife in the desperate effort of their assistants to seize the money and escape with it before the arrival of assistance. That they failed to get clear with the valises filled with coin was due to the stubbornness with which the bank employees resisted the attack and to the bravery of a young Polish waitress in a restaurant.

The messengers were employees of the Jefferson bank and were on their way from the branch at Clinton and Houston streets to the main bank on Canal street. On First street three men jumped upon them and three pepper in their faces, the leading thug attacking Samuel Edelman, who carried the bulk of the money, grabbing his money bag and attempting to run with it. The other thugs took care of Joseph H. Vokler and Abraham Stern, the other messengers.

Edelman tried to shake his assailant off, but was falling badly under the punning when Mrs. Eva Jaworska, waitress in a nearby restaurant, grabbed the leader of the attacking gang by the arm. She screamed so loudly for help that a patrolman came running up, frightening the other two thugs away, and was right at the heels of the man who had attacked Edelman by the time he had managed to shake himself free from the waitress. The fugitive was captured.

The man arrested gave his name as Rocco Riccobono. The police later arrested Riccobono's father, Giovanni Riccobono, and his two brothers, Salvo and Damiano Riccobono, who are held as suspects for a further examination.

Mrs. Vanderbilt was Miss Elizabeth French, daughter of the late Francis Greenwood French, president of the Manhattan Trust company and a member of the directorates of several railroads. She was married in January, 1900, to Mr. Vanderbilt, who had inherited upwards of \$50,000,000 from his father, the late Cornelius Vanderbilt.

The crisis in the domestic affairs of Alfred Gwynne Vanderbilt developed on April 1 last, when Mrs. Vanderbilt filed an action for divorce against her husband within an hour after he had sailed for England. The couple, it was reported, had not been living together for several months and shortly before the institution of the suit Mrs. Vanderbilt, who had occupied Oakland Farm, Mr. Vanderbilt's country place at Newport, went to the home of her brother-in-law, T. M. Vanderbilt, who is now in England.

Dr. B. recommended the Cuticura Remedies. She will soon be three years old and has never had a sign of the dread trouble since.
