This is a picture of what used to be the coal bin in the C. home since they put in clean automatic gas heat.

Poor Jones! He still thinks he's saving money spending his spare time shoveling fuel and cleaning out ashes.

This is a picture of a woman taking care of the furnace in a gas-heated home.

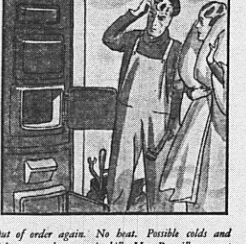

Mrs. B. used to worry every minute she was out of the house about the fire going out or getting no heat.

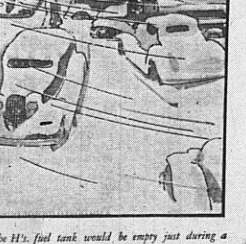

1 A. M. surprises in the suburbs. Mr. and Mrs. D. worried all evening about the fire going out.

The fire went out at 10 below and doctor says that Mary T. will have to stay in bed for a week.

Out of order again. No heat. Possible colds and sickness—a large recipe bill. Mrs. R. will now get gas heat and end worry of constant breakdowns and expensive service.

The H's fuel tank would be empty just during a blizzard like this, and it looks as if the H's will have to freeze for a while or move to a friend's home.

NEW... Low Cost Home-heating with Gas

Installed in your home at our expense... removed at our expense if you don't like it!

No other fuel ever made such an offer!

YOU INVEST NOTHING!

Without one cent of investment by you, we install the most modern burner in your furnace or boiler.

WITH the price of gas heat reduced to one-half the rate of 1930-31, gas for home-heating comes into its own.

Gas does all the work

The advantages of heating with gas have long been recognized. A single match represents your kindling pile... days and nights of back-breaking coal shoveling...

a match lights your furnace in the Fall and a turn of your fingers extinguishes it in the Spring.

A servant that never sleeps

You never have to climb down and up the cellar stairs... soil your clothes cutting kindling... starting fires... shaking ashes...

during the first, second, twelfth or any other month.

Let gas sell itself

During the nine heating months of the first year you pay \$3 a month rental on the equipment we install in the average home...

Certainly it is a daring offer. One no form of fuel used through the centuries has ever dared make. Why? Because gas has the qualities which set it apart—and above—all other fuels.
