## Picture of a man building a fire in a home heated with GAS

**M**AN, but it's great to get an extra hour of sleep in the morning. And wake up and find that the house is warm. With no running down the cellar steps in your pajamas to fire the furnace. Automatic gas heat brings real joy to every home. It eliminates all furnace tending and furnace watching, all grate shaking and ash hauling, chopping kindling, setting dampers and waiting for heat to come up.

What cleanliness. With gas heat there is no dust, grime or dirt. Walls and drapes stay clean. There is less dusting and scrubbing—advantages every clean housekeeper desires.

Why not install gas heat in your home and get the pleasure of automatic gas heat for the heating months to come this year and every year? The radical reduction of rates for gas heat—now less than half of what they were a few years ago—makes it possible for every home, even the most modest, to afford the luxury of gas heat.

Let us install gas heat now

Right now is the time to try gas heat, while this offer is still available. Decide now to have automatic gas heat, and banish furnace tending from your house forever. It will mean so much in comfort and cleanliness for every member of your family.

*You Invest Nothing*  
**To Try Gas Heat!**

We'll install gas heat in your present furnace or boiler at our expense. You try it for one month, two months or a year. While you are trying it you pay a small rental—only \$3 a month for the burner during the heating months in the average home. This charge is included with the bill for the gas you use. If at any time within the year you find you don't like gas heat—we'll take it out at our expense and replace your former heating equipment in good workmanlike order. But, if you decide you must have gas heat, the rental you have paid applies on the purchase price of the equipment.
