Horns of Jersey Cow on English Channel Island

Jersey, homeland of the Jersey cow, is a small island located in the English channel just off the coast of France. The land slopes from an elevation of 400 feet on the north to sea level on the south, the climate is mild throughout the year and cattle are housed only a few days. Land holdings are small, agriculture intensive, and cows spend their days rather closely confined. As a result the island cow is docile, delicate in form and substance, with slight muscle development and a bit thin at the heart, but uniform and beautiful. Bulls are more sturdy and aggressive.

Swedes Among the First Business Men in World

Sweden is one of the great nations of the world, asserts a writer in the Boston Globe. The Swedes have dwelt there for 5,000 years and were among the world's first business men. They claim to have been in America 500 years before Columbus, and it will be recalled that they settled one of our first 13 states. They claim to have founded the Russian empire and in discovery were first through the Northwest Passage. They were the first na-

tion to recognize the independence of the United States and there never has been any political misunderstanding between us.

Commercial men remember that the Swedish Copper Mountain Mining Company at Falun is the oldest existing industrial organization in the world, as its records go back to the year 1225.

Light Colors in Decorating

Light colors sometimes are considered more in keeping with the decorative schemes in homes than the conventional white or cream. The preference for a tinted paint is sometimes due to its assistance in giving softer lighting effects. Pure white, especially with strong lighting, is often too glaring for eye comfort. Some experts in color decoration consider that any color that reflects 65 per cent of the light that falls on it is suitable for ceilings.
