HIDDEN VALUE!

Prospecting reveals the hidden treasures of nature. Usage reveals the hidden value of a farm telephone. The prospector never knows when or where, if ever, his labor will be rewarded. The farmer, on the other hand, can be certain that his telephone will more than pay for itself. In times of doubt, uncertainty, or emergency the farmer can telephone without delay for advice, information or aid. The total savings and profits which the farmer can trace directly to use of his telephone often amount to more in actual dollars and cents than he pays for the service. Almost every day there is some use for the telephone that will save money. Let these savings grow and they become substantial—they are the telephone's hidden value!
